"...where a word is so much associated in modern times with a long and painful civil war. It was not considered suitable for a quiz designed for entertainment. I think this would be the similar for other parts of the world where people had suffered conflict, quite separate to whether a question is otherwise right or wrong. A quiz is very different to a political or diplomatic article where context and background are provided..."

The Sri Lankan High Commission has alleged that the term Eelam has "never been used as an indigenous name for Sri Lanka". However, since the dawn of the Christian Era, the word Eelam in the Tamil language has stood for the geographical identification of the entire island of what is known as Sri Lanka today. This distinction is imperative in separating the political use of the term. As such, the original question in The Guardian travel quiz, bears neither offence nor any negative connotation. However, by removing the question, The Guardian have succumbed to a political manoeuvre and inadvertently defied history by the influence of power driven by the Sri Lankan government.

The intentions of Sri Lankan government have been very clear in that they want to change the narrative of the island by manipulating both the history of the island and the history of the Tamil people.

Eelam means "the Gold Land". Archaeological evidence indicates that Eelam represents the geographic identification of the Tamil language on the island. It is the oldest term used to name those on the island, evidenced by many pieces of literature as well as epigraphy. Eelam was continuously used for over at least two thousand years, across the whole island based on the evi-

dence evolving from early Tamil epigraphy.

Archaeologists have obtained inscriptions of the Tamil (Brahmi) script on artefacts during research in Sri Lanka. Tamil (Brahmi) script is an early form of the Old Tamil Language that is understood to be dated between the 3rd century BC and 1st century CE. Tamil (Brahmi) script was one of the early adaptations of Tamil into written script. However, it has a longer history of oral tradition before this and was spoken for years it is claimed to be the first known written system in South Asia.

The Guardian are relied on for facts, information and references. Therefore, it is shocking to see that the freedom of journalism in this country is threatened by a government who themselves have had journalists killed for writing the unbiased truth. This incident can lead one to question the integrity of The Guardian.

The Tamil community are disappointed in The Guardian for three main reasons: The Guardian chose to accommodate politics over freedom of speech, they chose to address certain readers and completely dismissed others and they have made, what was originally an innocent travel quiz, a political victory for a government which oppresses its people.
